- ▶ The schedule above is subject to change.
- ▶ **Preparation** : Passport and Alien Card
- ▶ **Dress Code**: Smart Casual (No jean, No short pants and skirt, No T-shirt etc)

Sejong City

Sejong City is located in the central inner area of Chungcheongnam-do, and stretches south-north. Consequently, from ancient times, the current city areas were divided by the Charyeong Mountains and the Geum River into parts of Jeoneui, Yeongi, and Geumnam. But, with the development of streets in recent decades, those areas were combined into one.

1	Milmaru Observatory
 A tall, cylindrical observation tower with a spiral staircase on the exterior, situated on a hillside with green trees under a blue sky with light clouds.	<p>Located at the center of the Sejong Administrative Town, Milmaru Observatory is designed to provide a view of the city in every direction. You can see the ever-changing Sejong City at one glance as well as neighboring regions such as Gongju and Jochiwon. Moreover, as the observatory has various bird's-eye views for overall Sejong City, first village and land use, you can not only see the actual bird's-eye view but also imagine the future of Sejong City.</p>
2	Sejong Lake Park
 A large artificial lake with a prominent, modern building featuring a blue, curved, glass-like roof structure on a small island. A wooden walkway or bridge connects the island to the shore.	<p>The Sejong Lake Park has Korea's largest artificial lake, which is 62 times as big as a soccer field and has 3m of average water level. You can find a beautifully unfolded screen in the neighborhood with the National Library of Sejong and the Jeonwolsan Mountain, which fit in perfectly with the park. The Sejong Lake Park has five artificial islands: the Festival Island as a place for various festivals, the Stage Island that can boast of being the best floating stage in Korea, the Pool Island that associates with the seashore in the city, and the Water Flower Island and the Marsh Island with various water plants and ecological marshes. Plus, a trail and bicycle road near the lake can be a place for Sejong citizens to have a leisurely and relaxed time.</p>

<p>3 National Library of Korea, Sejong</p>	
	<p>With two underground floors and four floors above the ground, the National Library of Korea, Sejong represents the city's cultural center which is frequently visited by families since its foundation in 2013. It has the necessary facilities including a library, reading rooms, lecture hall and cafeteria, and provides various educational programs and lectures.</p> <p>The design of the National Library of Korea, Sejong, is a main attraction. The rooftop has the appearance of a book placed upside down, and as though flipping through the pages of a book passes data from folder to folder. This design has the meaning of accepting the digital concept with the analogue foundation along with humanistic emotions in an effort to make it an expressive library.</p>
<p>4 Presidential Archives</p>	
	<p>The Presidential Archives collects, manages, and services presidential records to establish a foundation for the understanding of history, and to ensure transparency and accountability of nation's public services that contribute to the development of democracy in the Republic of Korea.</p>

End.
